Entitled International Journal of Sustainable Social Science, this journal is committed to advancing interdisciplinary research and dialogue on the integration of sustainability within social sciences. In an era marked by rapid societal transformations and environmental challenges, the journal aims to foster an in-depth understanding of sustainable development from a social perspective, addressing both the pressing needs and the opportunities for creating a harmonious and resilient future.

As we continue to explore the complexities of global interconnectedness, this journal brings together scholars, policymakers, and practitioners from diverse fields, providing a platform for innovative ideas and solutions. Each issue highlights critical issues, including environmental justice, social equity, and the evolving role of communities in shaping sustainable practices.

Our goal is not only to examine the theoretical underpinnings of sustainability but also to provide actionable insights that can guide decision-making and inspire meaningful change in real-world contexts. We hope that the International Journal of Sustainable Social Science becomes an essential resource for those working towards a more sustainable, just, and equitable society for future generations.

We invite contributions that explore the intersections of sustainability with culture, politics, economics, and education, as we collectively work towards a more sustainable world for all.

Happy Reading,

Marisa Yunita, S.Pd., M.M, Universitas HKBP Nommensen
