Editorial

Vol. 3 No. 5 May 2025

In an era where technology and social dynamics are continuously evolving, the intersection of these two fields has become increasingly significant. The International Journal of Advanced Technology and Social Sciences seeks to explore this convergence, offering insights, research, and innovations that shape both technological advancements and their social implications.

As the world becomes more interconnected, understanding how technological developments impact society, and vice versa, has never been more essential. This journal aims to foster interdisciplinary collaboration, bringing together experts from various domains—engineering, computer science, social sciences, and humanities—to provide a holistic view of the modern challenges and opportunities that lie at the intersection of these spheres.

The articles featured in this journal explore cutting-edge innovations in technology, as well as the social, ethical, and cultural dimensions that these advancements inevitably bring. From artificial intelligence to the digital divide, climate change to societal transformation, each issue aims to contribute to a deeper understanding of how technology shapes human experiences and how social contexts influence the development and application of new technologies.

In the following pages, you will find research that challenges assumptions, presents novel perspectives, and proposes solutions to some of the most pressing issues of our time. This journal stands as a platform for those who are committed to both advancing technology and improving society through thoughtful, critical engagement.

We hope that The International Journal of Advanced Technology and Social Sciences will inspire new discussions, collaborations, and ideas that pave the way for a more equitable and innovative future.

Happy Reading,

Marisa Yunita, S.Pd., M.M, Universitas HKBP Nommensen
